

25th NOVEMBER

10.00-12.15 “BACK TO THE FUTURE”: BUS, RAIL AND SHARING

Plenary

Organized by Sustainable Development Foundation and National Observatory on Shared Mobility

Technological trends are transforming the bus, which is undergoing a full revival compared to the past, and with it the entire mobility system. Digitalization, new infrastructure, electrification, and innovation are making scheduled transport increasingly efficient and attractive. But the real challenge isn't just about the bus: it's about its ability to interact with trains, sharing mobility services, and new on-demand mobility solutions to build a truly integrated ecosystem.

Moderators and introduction: **Anna Donati**, CEO Roma Mobility Service (RSM) and **Valentino Sevino**, Director Mobility, Environment and Territory Agency – Milan (AMAT)

The Metamorphosis of the Bus

- **ATAC**, TBD – From Tap&go to Automatic Vehicle Monitoring
